Wednesday, October 12, 2005

	Time
NQA Main Committee (Closed Session-Personnel)	8:00AM – 8:30 AM
NQA Main Committee	8:30 AM – 3:00 PM

 * The Member Interface Meeting is a meeting for Subcommittees and individuals to work on topics and discuss ballot comments. Members are encouraged to schedule their individual or group meeting and to cooperate with others on the room availability. (This is an optional meeting based on needs.)

 ** This meeting is important for **all Main and Subcommittee Members** to provide an overview of the NRC comments received in June. The actions taken and planned activities to resolve the NRC comments will be reviewed, and any proposed Standard actions referred to the applicable Subcommittees for action at this meeting. *(+purpose is to achieve endorsement of 2007)*

 *** The Task Group on New Generation will have its initial meeting. An overview of new generation activities will be presented and the Task Group will establish a process for identifying and addressing issues related to new generation. (All Main and Subcommittee Members interested in new generation are invited to attend.)

**** New DOE QA Order 414.1C mandates the use of NQA-1-2000 (or equivalent) to implement the nuclear safety software work practices. DOE will provide an overview of the requirements and guide.
